CROSSIO ®X

CROSSIO LifePower 1000

Leading 1000W powerstation with FREE 100W solar panel worth 329 €

– CROSSIO SolarPower 100W solar panel as a FREE gift
– UPS function (switching within 10 ms)
– LiFePO4 battery (electric vehicle grade)
– Charge to 80% in just 1.6 hours
– Boost-Up mode - permanently up to 1960 W
– Retractable handle for easier storage
– USB-C a USB-A quick charge
– Powerful flashlight with 3 light levels
– Large clear display

FREE GIFT

EAN: 8594202840714, PK: CRO-LP-1000

Outage protection with UPS function

With the CROSSIO LifePower 1000 powerstation, you can use the built-in UPS function to protect your sensitive devices from unexpected power outages. Switching takes place in as little as 10 ms, you will hardly find a faster one elsewhere.

Top quality LiFePO4 battery

The powerstation is equipped with a state-of-the-art battery that is extremely safe, resistant to damage and non-flammable. Compared to classic Li-ion batteries, it will provide you with a significantly longer service life (>3,500 charge cycles).

Ultra fast charging

You can charge the powerstation to 80% in just 1 hour and 36 minutes. For charging, you can use any of the four inputs.

Boost-Up mode for up to 1960 W

Do you need to power devices that have a power consumption higher than 1000 W? The Boost-Up function allows that. You can connect devices with an input of up to 1960 W. The powerstation will reduce the input of the connected device to the level of 1000 W and thus cope with more demanding appliances, such as a blender, coffee grinder or heater without overloading the station. However, Boost-Up may not be compatible with all devices. Before use, make sure that you do not endanger the sensitive electronics of the appliance.

Practical large display

The CROSSIO LifePower 1000 station is equipped with a practical and clear display. It shows the current consumption from the station, capacity in percentage and hours and switched on outputs. The display will also notify you of high or low temperature, switched on fan or report a possible error situation. In addition, it is very easy to read even in bright sunlight.

Charging via solar panel

You can also easily charge the station directly from the solar panel. The station has two DC5525 150 W inputs and together you can charge the station up to 300 W using solar panels. It is fully compatible with the CROSSIO SolarPower 100W panel.

Maximum protection

CROSSIO LifePower 1000 is protected against short circuit, overcurrent, overvoltage and overheating. This allows you to charge multiple devices at once and still keep them all safe and protected.

Large LED flashlight

On the back of the powerstation, you will appreciate the very powerful LED flashlight. You can turn on the light at 50%, at 100%, or you can activate the SOS flashing function.

Capacity	1075.2 Wh
Constant power	1000 W
Peak power	2000 W
Battery type	LiFePO4
Weight	14.5 kg
Life cycles [1]	3500+
Display	Ano
UPS function	Ano
Dimensions	34*22*27 cm

Charging time [1]
» 1.6 h - AC (230V)
» 8-9 h - Car charging 24V
» 16-18 h - Car charging 12V
» 4-6 h - Solar panel 2x150 W

Inputs
» 1x AC (230V), 600 W
» 2x DC 5525 solar 150W, total 300 W
» 1x Car charging 12/24V

Outputs
» 1x AC (230V)
» 2x USB-A: 18 W, total 36 W
» 1x USB-C (PD): 45 W, total 90 W
» 1x USB-C (PD): 100 W, total 200 W
» 2x DC 5521: 60W, total 120 W
» 1x Car Charging

Package contents
» CROSSIO LifePower 1000
» AC charging cable
» Car charging cable to DC 5525
» Solar cable MC4 to DC 5525
» CROSSIO accessories bag
» User manual

[1] to 80 % capacity of the battery
